[Risk Assessment of Food Allergens. Part 1: Review and validation of Codex Alimentarius priority allergen list through risk assessment](#) Food and Agriculture Organization of the United Nations, World Health Organization, 2022-03-22. The labelling of food allergens in pre-packaged foods plays a key role in protecting food allergic individuals as no preventative clinical treatment is currently available. The list of major foods and ingredients known to cause hypersensitivity was included into the Codex General Standard for the Labelling of Packaged Foods (GSLPF) in 1999. There have been many scientific developments in the understanding of food allergens and their management since the original drafting of the GSLPF. Thus in response to the request from Codex for scientific advice including current evidence of consumer understanding of allergens, FAO and WHO convened a series of three expert meetings to provide scientific advice on this subject. The purpose of the first meeting of the Ad hoc Joint FAO/WHO Expert Consultation on Risk Assessment of Food Allergens was to review and validate the Codex priority allergen list through risk assessment. This report focuses on the deliberations and conclusions of this meeting.
