The Yale Literary Magazine ,1854 **The Moon** David Whitehouse,2016-04-07 In *The Moon* David Whitehouse explains how our nearest celestial neighbor was created and what moonrocks tell us of its earth shattering origins and how its existence may have been a crucial factor in mankind being here at all Whitehouse discusses how man has related to it worshipped it and blamed it for his own lunacy though can it really affect our behavior He tells how the first person to look at the moon through a telescope was not Galileo as is commonly believed but an Englishman who knew Shakespeare and had a part in the Gunpowder Plot While some of the story of the modern moon race may be known the first moon race to map its surface has not been charted before and is one of the most dramatic and unexpected stories in science The recent discovery of ice hidden in the moon s polar regions opens up new possibilities for space travel that mean it is essential that mankind returns there if we are ever to journey to the rest of the solar system **Catalog of Copyright Entries** ,1946 [Annals of the Astronomical Observatory of Harvard College](#) Harvard College Observatory,1862 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from
