Skill or Standard for focus / Objective: The standard, skill, or learning objective for the lesson goes in this box!

CORNELL NOTES CUE COLUMN

This section should include key words or phrases as well as vocabulary terms and potential exam questions.

This column is for the:

WHAT'S
WHO'S
WHEN'S and
WHERE'S

NOTE TAKING COLUMN

This section of your page is dedicated to lesson time and in-class note taking. You might want to include:

- main points
- diagrams, graphs, sketches, drawings, or charts
- Bullet points
- Concise sentences
- Shortened abbreviations / symbols / paraphrasing

Also try to leave lines between points so you can go back in and add any brief notes you may have missed. This extra space will also give you a sense of clarity.

You don't have to use a ruled line version - try one with a blank note taking section to experiment with mindmapping or doodles - whatever tickles your fancy. Make it personal!

You might say this column is for the WHY's and How's with some of these guys thrown in!

SUMMARY SECTION

This section should be written last! It should also only really contain a basic condensed summary of your notes in the cue column and important details of your main notes. It is used to quickly find and digest info later.

Resources in Education ,1999 *Getting to the Common Core* Sharon L. Spencer,Sandra Vavra,2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book

We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research

Teaching Students to Drive Their Learning Douglas Fisher, Nancy Frey, Sarah Ortega, John Hattie, 2023-04-15 High levels of engagement it's not an impossible dream But to attain it we need to focus on what galvanizes learning and ensure we are offering the tools and mindsets with which students can lean in In this playbook an ace team of educators give us the goods to guide self-starting learners Nine modules show us how to Coherent standards success criteria tasks and goals so students can travel clear pathways Offer tools that allow learners to recognize the gap between their current performance and the expected performance and select strategies to close that gap Talk with students about engagement as a continuum and that there are actions they can take to heighten their buy-in to any endeavor Stress test our lesson plans to ensure students can discuss debate create and problem solve around highly relevant content Use lots of low-stakes assessment and feedback routines to develop effective collaboration that doesn't depend on us Our job as teachers is to guide learning

experiences that build knowledge and self efficacy But from there we need to stay on the sidelines and let students play Only then will they develop the muscle to persevere the strategic actions to excel and the confidence to make our curriculum the springboard of their own dreams and goals
